Campaign Performance Summary — Q1 2025

Overview

This report summarises the marketing campaign performance across all major releases in Q1 2025. Total marketing expenditure for the quarter was █197 Crore across digital, out-of-home (OOH), and influencer/celebrity channels. Blended ROI across all campaigns was 14.8x, though performance varied significantly by title and channel.

Campaign Summary by Title

Title	Total Spend (Cr)	Impressions (M)	Conversions	Blended ROI
Stellar Run	█80 Cr	273 M	17,18,000	21.8x
Dark Orbit	█59 Cr	103 M	4,37,000	7.6x
Last Kingdom	█41 Cr	118 M	7,28,000	18.2x
Hasee Toh Phasee 2	█25 Cr	35 M	1,38,000	5.5x
Comedy Circus	█18 Cr	25 M	88,000	4.7x
Jugaad Junction	█11 Cr	14 M	43,000	3.9x

Channel Analysis

Celebrity Collaboration was the standout channel of the quarter, delivering 32x ROI for Stellar Run's pre-release campaign. A coordinated push involving 14 A-list celebrities generated 85 million impressions in 10 days — unprecedented for a CineVerse release.

YouTube remained the highest-volume channel by impressions, with trailer content for Stellar Run accumulating 68 million views. YouTube ROI averaged 18.6x for top-performing titles.

Instagram drove the highest conversion rates among 18–34 demographics. Reel-format content for Stellar Run achieved a 4.4% click-through rate — 2.8x the platform benchmark.

OOH (Out-of-Home) delivered solid brand visibility for premium releases but showed weak ROI for comedy titles. Recommend reallocating OOH budget for lower-rated comedy releases to digital.

Key Findings

- Stellar Run's celebrity collab campaign is a replicable template for future action releases.
- Comedy titles suffer from low organic amplification — paid spend cannot compensate for weak word-of-mouth.

- Dark Orbit's marketing ROI (7.6x) signals misalignment between campaign messaging and audience expectations.
- Instagram Reels outperform static posts by 3.1x on conversion for all genres.
- Hotstar Ads placement drove 17.9x ROI for Stellar Run — underused for other titles.
- Tier-2 city digital spend remains under-indexed; early tests in Jaipur and Lucknow showed positive signals.
